2 ABOUT PRIVATE RETIREMENT SCHEMES

2.1 THE PRIVATE RETIREMENT SCHEME (PRS)

PRS is a retirement scheme governed by a trust, offered or provided to the public for the sole purpose, or having the effect, of building up long-term savings* for retirement for its members.

A PRS may be illustrated as a tripartite relationship between the PRS Provider, the trustee and members governed by a legally binding deed registered with the SC. The SC regulates the industry as well as the operations and administration of PRS through the CMSA 2007 and SC Guidelines. The PPA which is approved by the SC, perform the functions of record keeping, administration and customer service for members in relation to contributions made in respect of a PRS and any other duties and functions as may be specified by the SC.

A range of funds can be offered under a scheme by a PRS provider. Notwithstanding this, a PRS provider must at all times offer 3 core funds for the default option within the scheme.

** Funds under PRS are neither capital guaranteed nor capital protected funds.*

2.2 BENEFITS OF INVESTING IN FUNDS UNDER A PRS

Benefits of investing in funds under a PRS include:

1. ***Diversification***: Diversification involves the process of spreading risk over a broad portfolio of asset classes which include but are not limited to stocks and/or bonds or other forms of securitised debt. Further diversification can also be achieved by investing in stocks and/or bonds or other forms of securitised debt in different companies, sectors, countries or regions. The funds facilitate the diversification process by providing you with an avenue to pool monies for the purchase of a diversified portfolio of stocks and/or bonds or other forms of securitised debt that will bring returns at lower risks compared with investing directly in stock and/or bonds or other forms of securitised debt markets.

2. ***Professional management***: The funds are managed by professional fund managers with the expertise and resources to manage the assets of the funds. You can thus benefit from this professional fund management of investments via the funds at a shared (affordable) cost.

3. ***Ease of transaction***s: The funds do not require cumbersome administrative or paperwork or record keeping on your part in managing your investments.

4. ***Enjoy personal tax relief***: If you are a resident in Malaysia and have made contributions to the funds, you are allowed to claim a tax relief on the amount of contribution made to the funds, subject to a maximum amount of RM3,000 per annum (or any other such amount as may be determined by the relevant authorities from time to time).

5. ***Income of the fund is exempt from Malaysian income tax***: PRS is an approved scheme for Malaysian income tax purposes pursuant to Section 2 of the Malaysian Income Tax Act 1967 ("the Act"). The income of the funds is exempted from tax under paragraph 20, Schedule 6 of the Act. Since the income of the funds is exempt from Malaysian income tax, the income* distributed from the funds should be exempted from Malaysian income tax as well.

   ** Distribution (if any) will be automatically reinvested into the fund(s).*

6. ***Tax deduction for employers on contribution made***: Employers who make contribution to the funds under the PRS on behalf of their employees, resident or non resident in Malaysia, are allowed to claim a tax deduction against their business income on the contribution made. The allowable tax deduction is, together with the contribution made to any other approved scheme (such as EPF), restricted to 19% of the employees' remuneration.

This is a replacement Disclosure Document. This Disclosure Document is issued to replace and/or supersede the Disclosure Document of Public Mutual Private Retirement Scheme–Conventional Series dated 24 February 2021.

2.3 RISK FACTORS

General risks of investing in funds under a PRS include:

1. ***Capital and returns not guaranteed***: The fund is exposed to a variety of risks by nature of the investments it is engaged in. As such, the fund does not provide a guarantee on capital contributed nor does it guarantee a fixed rate return.
2. ***Inflation risk***: Inflation risk refers to the loss in purchasing power of your investment returns due to a general increase in prices of goods and services. If the returns from your investments do not keep pace with the inflation rate, the real rate of returns from these investments will be impacted.
3. ***Risks associated with the default option***: Under the default option, your contribution will be automatically switched (regardless of NAV movement trends) into the relevant core fund upon reaching the prescribed age. At the point of switching, the unit price may be lower than the price you paid when you contributed into the fund, and as such, you will incur losses.
4. ***Legal and regulatory risk***: Changes in laws and regulations in the countries that the fund is invested in may impact the investments of the fund. Apart from this, there is also the risk that changes in laws/regulations/guidelines relating to PRS could affect your PRS account or accessibility to the monies in the account.

Where the fund participates in stock market-related investments, the following risks become key considerations:

1. ***Market risk***: Market risk refers to the possibility that an investment will lose value because of a general decline in financial markets, due to economic, political and/or other factors, which will result in a decline in the fund's NAV.
2. ***Specific security risk***: Prices of a particular security may fluctuate in response to the circumstances affecting individual companies. As such, adverse price movements of a particular security invested by the fund may adversely affect the fund's NAV and unit price.
3. ***Liquidity risk***: Liquidity risk refers to the ease of liquidating an asset depending on the asset's volume traded in the market. If the fund holds assets that are illiquid, or are difficult to dispose of, the value of the fund will be negatively affected when it has to sell such assets at unfavourable prices.
4. ***Unlisted security risk***: This risk relates to investments in securities which are not listed on a securities exchange, such as stocks of unlisted companies. Investment in unlisted securities may subject the fund to liquidity risks upon the disposal of these securities which may impact the value of the fund.
5. ***Risk associated with investments in warrants***: The market price of warrants held by the fund will depend on the current market price of the underlying security, the exercise price of the warrants and the time to expiration of the warrants. Such investments may experience time decay, and the erosion of value accelerates as the warrant approaches its expiry date. Any adverse movements in the market price of the warrants may impact the fund's NAV and unit price.

Investment in bonds or other forms of securitised debt brings forth the following specific investment risks:

1. ***Interest rate risk***: Interest rate risk refers to the impact of interest rate changes on the valuation of bonds or other forms of securitised debt, money market instruments and deposits. When interest rates rise, prices of bonds or other forms of securitised debt generally decline and this may lower the market value of the fund's investment in bonds or other forms of securitised debt. The reverse applies when interest rates fall. The returns of the fund's investments in money market instruments and deposits move in tandem with interest rates. A decline in interest rates will lower the returns of the fund's investments in money market instruments and deposits. For example, when interest rates fall, deposit placements would be reinvested at lower interest rates and subsequently yield lower returns to the fund.
2. ***Credit risk***: Credit risk relates to the creditworthiness of the issuer of the securities or money market instruments and deposits which is dependent on the issuer's ability to make timely payments of interest or principal. In the event that the issuer of a security or money market instruments and deposits defaults in the payment of interest and/or principal, the value of the fund may be adversely affected.

ABOUT PRIVATE RETIREMENT SCHEMES (CONT'D)

In addition to the above, the following will also need to be considered:

1. ***Manager risk***: This risk refers to the day-to-day management of the fund by the fund manager which will impact the performance of the fund. For example, investment decisions undertaken by the fund manager pertaining to asset allocation and security selection which may not be in line with market movements, or non-conformance with regulations and internal policies and procedures, may adversely affect the performance of the fund.

2. ***Currency risk***: If the fund invests in assets denominated in foreign currency, the fund may be exposed to currency fluctuation risks. If the currencies in which the investments are denominated depreciate against the local currency, the fund's NAV may be adversely affected and vice versa. To mitigate such risk, the fund may undertake hedging strategies. However, the fund would not benefit from any potential upside if currencies move in the opposite direction of the hedging strategy.

3. ***Country risk***: Funds with foreign investments may be affected by changes in the economic and political climate, restriction on currency repatriation or other developments in the law or regulations of the country in which the fund invests in. For example, the deteriorating economic condition of such countries may adversely affect the value of the investments undertaken by the fund in those affected countries. This in turn may cause the NAV of the fund or prices of units to fall.

Please refer to ***Chapter 3: Detailed Information on The Scheme and Funds*** for information on the fund specific risks and risk management strategies.

Risk Management Strategies

PRS-GRF, PRS-MDF, PRS-EQF and PRS-SEQF

Asset allocation, liquidity management and diversification strategies employed are central to the efforts to manage the risks posed to the fund.

To mitigate risks arising from significant volatilities in times of adverse market movements, foreign currency exposure and foreign interest rate movements, the fund may employ hedging strategies utilising futures contracts, foreign exchange forward contracts and options.

Investments in warrants will be assessed on ongoing basis as it can potentially increase the volatility of the fund's returns.

To manage credit risk, credit analysis is conducted and credit ratings of financial institutions are monitored on an ongoing basis. The fund will focus on securities issued by companies with sound financial position whereby gearing ratio and interest cover ratio are within acceptable levels of the industry in which the issuer company operates.

PRS-CVF

The risk management process focuses on managing the impact of changes in the interest rate trend and credit risk profile of the issuer of bonds or other forms of securitised debt.

The fund manager will adopt various investment strategies which include portfolio diversification and varying the asset allocation between the long-tenured and short-tenured bonds or other forms of securitised debt and money market instruments to adjust the risk and return characteristics of the fund. To manage credit risk, credit analysis is conducted and credit rating of financial institutions or bonds or other forms of securitised debt issuers is monitored on an ongoing basis. The fund will focus on securities issued by companies with sound financial position whereby gearing ratio and interest cover ratio are within acceptable levels of the industry in which the issuer company operates.

Liquidity Risk Management

Prudent liquidity management such as cash flow and redemption monitoring (for example, single customer exposure, risk appetite limit on redemption rate* and liquidity stress test) is in place to ensure that the funds maintain reasonable levels of liquidity to meet any redemption request.

DETAILED INFORMATION ON THE SCHEME AND FUNDS (CONT'D)

Under exceptional circumstances where the market value or fair value of a material portion of the funds' assets cannot be determined (which include but not limited to the closure of a securities exchange or trading restrictions on a securities exchange and an emergency or other state of affairs whereby there is no price discovery which impact a material portion of the fund's NAV), as the last recourse, the PRS Provider may consult trustee to suspend dealing in units. This measure is taken when there is good and sufficient reason to do so, considering the interest of members.

If suspension of redemption is imposed, members of the fund would be unable to redeem the units they had invested in the fund temporarily. The members will have to remain invested in the fund, as well as continue to be subjected to the risks inherent to the fund during the suspension period. Regulatory authorities and members will be informed in the event a redemption suspension period is imposed and that the suspension will cease as soon as practicable and in any event, within 21 days (or any other period as may be determined by the SC) of the commencement of suspension. The period of suspension may be extended only if it is in the best interest of the members and will be reviewed on a weekly basis by the fund's trustee.

** Risk appetite limit on redemption rate is a risk indicator to monitor the average redemption rate against the internal risk threshold/limit set.*

DETAILED INFORMATION ON THE SCHEME AND FUNDS (CONT'D)

3.6 VALUATION OF PERMITTED INVESTMENTS

The permitted investments of the funds are fairly valued based on the following valuation methods:

Listed shares or securities equivalent to shares – valuation is based on the official closing price or last known transacted price on the Eligible Market on which the investment is quoted. If the price is not representative or not available to the market, the securities will be valued at fair value, as determined with due care and in good faith by the PRS Provider, based on the methods or bases approved by the trustee after appropriate technical consultation.

Unlisted shares – fair valuations which are based on methods that are acceptable to the PRS Provider and approved by the trustee.

Listed and unlisted bonds or other forms of securitised debt (including commercial papers) – for listed bonds or other forms of securitised debt, valuation is based on the official closing price or last known transacted price on the Eligible Market on which the investment is quoted.

In the case of unlisted bonds or other forms of securitised debt (including commercial papers) denominated in RM, valuations are carried out on a daily basis using fair value prices quoted by a Bond Pricing Agency (BPA) registered with the SC. Other foreign unlisted bonds or other forms of securitised debt are valued daily based on fair value by reference to the average indicative yield quoted by independent and reputable institutions.

If the valuations are not representative or not available to the market, the bonds or other forms of securitised debt will be valued at fair value, as determined with due care and in good faith by the PRS Provider, based on the methods or bases approved by the trustee after appropriate technical consultation.

Money market instruments (excluding unrestricted investment accounts) – money market instruments which include negotiable instrument of deposits are valued at market yields based on the remaining days to maturity.

Unrestricted investment accounts and deposits with financial institutions – the value of such investments shall be determined on a daily basis by reference to their principal value and the accrued interest thereon for the relevant period.

Units or shares in other collective investment schemes – for unlisted collective investment schemes, valuation is based on last published repurchase price. For listed collective investment schemes, valuation is based on market price of the respective exchanges. If no market price is available or valuation based on market price does not represent the fair value of investments, the shares will be valued at fair value, as determined with due care and in good faith by the PRS Provider, based on the methods or bases approved by the trustee after appropriate technical consultation.

Foreign exchange forward contracts – all foreign exchange forward contracts are marked-to-market daily and valued at fair value using forward rate of the remaining tenure to maturity.

Futures contracts – all futures contracts are marked-to-market at the end of each trading day. Any gains or losses are immediately reflected upon marking to market.

Suspended securities – will be valued at their suspended price unless there is conclusive evidence to indicate that the value of such stocks have gone below the suspended price, whereupon their value will be ascertained in a manner as agreed upon by the PRS Provider and trustee.

All foreign securities and assets are converted into RM based on the bid exchange rate quoted by Refinitiv (formerly known as Thomson Reuters)/Bloomberg at United Kingdom time 4:00 p.m. the same day.

5 TRANSACTION INFORMATION

5.1 DETERMINATION OF PRICES

Valuation Point

Valuation will be conducted after the close of business of Bursa Securities for the relevant day. As certain foreign markets in which the funds may invest in have yet to close due to the different time zones of these countries, the valuation point may be extended to 5:00 p.m. (or any other such time as may be permitted by the relevant authorities from time to time) on the following day in which the PRS Provider is open for business. As such, the daily prices of the funds will not be published on the next Business Day but instead will be published the next following Business Day (i.e. the prices will be 2 days old).

NAV per Unit

The NAV per unit is obtained by dividing the NAV of the fund by the number of units in issue.

Illustration:

Total NAV (RM)		UIC (units)		NAV per unit (RM)
49,000,000	÷	98,000,000	=	0.50000000

Single Pricing

Purchase and redemption of units are quoted and transacted at a single price, i.e. at the NAV per unit of the fund(s). Sales charge and redemption charge (if any) are computed and charged separately, and are not incorporated in the quoted prices of the funds.

Forward Pricing

Both the purchase and redemption transactions are traded at prices *next determined*. A request issued by you to purchase or redeem units of the fund will be carried out at a price as at *the next valuation point after the application is received and accepted by the PRS Provider*. In circumstances where the prior authorisation of the PPA is required, any redemption of units will be at a price that is the NAV of the fund as at the next valuation point after the PPA's authorisation is received by the PRS Provider.

Contributions banked in over the counter through Public Bank branches on any Business Day will be processed based on the price determined for the same Business Day.

<u>Payment received before or at 4:00 p.m.</u>
Processed based on the price determined for the same Business Day.

<u>Payment received after 4:00 p.m.</u>
Processed based on the price determined for the next Business Day.

Any contribution and transaction requests made on a non-Business Day will be treated as contributions or transaction requests made on the following Business Day.

TAXATION OF THE FUNDS AND MEMBERS

Public Mutual Berhad
8th Floor, Menara Public Bank 2
No. 78, Jalan Raja Chulan

13 June 2023

Dear Sirs

Re: Taxation of the Private Retirement Scheme Funds and Members

This letter has been prepared for the inclusion in this Replacement Disclosure Document of Public Mutual Private Retirement Scheme (PRS) – Conventional Series in connection with the offer of units in the Private Retirement Scheme ("the PRS") which comprise the following Private Retirement Scheme Funds ("the Funds"): -

- Public Mutual PRS Growth Fund
- Public Mutual PRS Moderate Fund
- Public Mutual PRS Conservative Fund
- Public Mutual PRS Equity Fund
- Public Mutual PRS Strategic Equity Fund

Taxation of the Funds

Income Tax

The Funds are offered under the PRS approved by the Securities Commission ("SC") in accordance with the Capital Markets and Services Act 2007. The PRS is an approved scheme for Malaysian income tax purposes pursuant to Section 2 of the Malaysian Income Tax Act, 1967 ("the Act"). Thus, the income of the Funds is exempt from tax under Paragraph 20, Schedule 6 of the Act.

The Funds may receive dividends, interest and other income as well as gains from investments outside Malaysia and such income may be subject to tax in the country from which it is derived.

Single tier dividends received by the Funds are exempt from tax and no longer carry with them any tax credit. Thus, there will not be any tax refund from the single tier dividends received by the Funds.

Real Property Gains Tax ("RPGT")

Gains on disposal of investments by the Funds will not be subject to income tax in Malaysia. However, such gains may be subject to RPGT in Malaysia, if the gains are derived from sale of Malaysian real properties and shares in Malaysian real property companies (as defined). Such gains would be subject to RPGT at the applicable rate depending on the holding period of the chargeable assets.

Sales Tax and Service Tax

The Goods and Services Tax ("GST") has been replaced by Sales Tax and Service Tax effective from 1 September 2018.

Under the Sales Tax Act 2018, Service Tax Act 2018 and subsidiary legislation, the sales tax rate for taxable goods is 5% or 10% while the service tax rate for taxable services is generally 6%. There are certain goods which are exempted from sales tax.

The issue, holding or redemption of any unit under a trust fund does not fall within the list of taxable services under the First Schedule of the Service Tax Regulations 2018 and hence, is not subject to service tax. The investment activities of the Funds such as buying and selling of securities and deposits in financial institutions are also not subject to service tax. As such, if the Funds are only deriving income from such activities, the Funds are not liable to be registered for service tax.

This is a replacement Disclosure Document. This Disclosure Document is issued to replace and/or supersede the Disclosure Document of Public Mutual Private Retirement Scheme–Conventional Series dated 24 February 2021.

TAXATION OF THE FUNDS AND MEMBERS (CONT'D)

However, certain expenses incurred by the Funds such as legal fees, consultancy fees and management fees may be subject to service tax at 6%. For management fees, this specifically excludes fees charged by any person who is licensed or registered with the Securities Commission for carrying out the regulated activity of fund management under the Capital Markets and Services Act 2007. The service tax incurred by the Funds is a cost to the Funds and is not recoverable, unlike the GST input tax which was claimable under the GST regime.

Based on the Finance Act 2018, the imposition and scope of service tax has been widened to include any imported taxable service. This is effective from 1 January 2019.

Taxation of Members' Employers

Income Tax

Employers who make contributions to the Funds on behalf of their employees, resident or non-resident in Malaysia, are allowed to claim a tax deduction against their business income for the contributions made. However, the allowable tax deduction is, together with contributions made to any other approved scheme (such as Employees Provident Fund), restricted to 19% of the employees' remuneration based on the existing Malaysian tax laws.

Taxation of Members

Income Tax

Profits distributed by the Funds to their members in the form of units will not be taxable.

Individual members who are resident in Malaysia and who have made contributions to the Funds during the basis year for a Year of Assessment ("YA") are allowed to claim a tax relief on the amount of the contributions made to the Funds together with any deferred annuity payment made, subject to a maximum amount of RM3,000 for a YA, up to YA 2025.

Units split by the Funds will be exempt from tax in the hands of the members.

Members who make withdrawals from the Funds before reaching the age of 55 (other than by reason of permanent total disablement, serious disease, mental disability, death, permanently leaving Malaysia, healthcare or housing, for which such withdrawal shall be in compliance with criteria as set out in the relevant guidelines of the Securities Commission) would be subject to a tax at the rate of 8% on the amount withdrawn. The PRS provider or manager must deduct the 8% withholding tax on the withdrawal amounts before making payment to the members.

Service Tax

Only taxable services listed in the First Schedule of the Service Tax Regulations 2018 are subject to service tax, which exclude investment income or gains.

However, certain expenses such as legal fees, consultancy fees and management fees may be subject to service tax at 6%. For management fees, this specifically excludes fees charged by any person who is licensed or registered with the Securities Commission for carrying out the regulated activity of fund management under the Capital Markets and Services Act 2007.

Based on the Finance Act 2018, the imposition and scope of service tax has been widened to include any imported taxable service. This is effective from 1 January 2019.

This is a replacement Disclosure Document. This Disclosure Document is issued to replace and/or supersede the Disclosure Document of Public Mutual Private Retirement Scheme–Conventional Series dated 24 February 2021.

TAXATION OF THE FUNDS AND MEMBERS (CONT'D)

The tax position is based on our understanding and interpretation of the Malaysian tax legislations and proposals as they stand at present. All prospective investors should not treat the contents of this letter as advice relating to taxation matters and are advised to consult their own professional advisers concerning their respective investments.

Yours faithfully
