North Asian Semiconductor Stocks Rallied in February 2026

- **What happened:** The S&P 500 Index eased in February 2026 amid tariff uncertainties following the U.S. Supreme Court's ruling that tariffs imposed under the International Emergency Economic Powers Act (IEEPA) were not legal. Meanwhile, the Ringgit-based returns on U.S. Dollar (US\$)-denominated investments were dampened by the greenback's continued weakness during the month.
- Regional equity markets traded mixed in February 2026, with the South Korea and Taiwan markets rising to new highs, driven by gains in selected semiconductor stocks amid robust demand for advanced memory chips. On the other hand, the Chinese markets declined on selected profit-taking activities following the release of data indicating China's softer-than-expected manufacturing activities for January 2026.
- The ASEAN equity markets generally rose for a fifth consecutive month, led by strength in the Thailand market following the appointment of a new Prime Minister and the Thai central bank's interest rate cut. On the local front, the FBM KLCI traded lower amid profit-taking activities in the financial, telecommunications and utilities sectors.
- **What's next:** Looking ahead, investors will closely monitor U.S. trade policies and the economic impact of geopolitical developments in the Middle East. Markets may experience volatility in the near term due to higher oil prices as a result of disruptions in the global oil supply chain.
- Several countries have the fiscal and/or monetary policy tools to support their domestic economies. These could be in the form of additional fiscal spending, liquidity injections and/or interest rate cuts.
- Equity investors should adopt a long-term perspective and practise Ringgit-unit cost averaging to potentially benefit from a rebound in the markets when the Middle East tensions subside.

Lipper Leaders:

Total Return

Lipper Ratings for Total Return reflect funds' historical total return performance relative to peers.

Consistent Return

Lipper Ratings for Consistent Return reflect funds' historical returns, adjusted for volatility, relative to peers.

Preservation

Lipper Ratings for Preservation reflect funds' historical loss avoidance relative to other funds within the same asset class. Scores for Preservation are computed from three broad asset classes — equity funds, mixed-equity funds, and fixed-income (bond) funds.

The Lipper Ratings are subject to change every month and are based on an equal-weighted average of percentile ranks for the Total Return, Consistent Return and Preservation metrics over three-, five-, and ten-year periods (if applicable). The highest 20% of funds in each peer group are named Lipper Leaders or a score of 5, the next 20% receive a score of 4, the middle 20% are scored 3, the next 20% are scored 2, and the lowest 20% are scored 1.

Lipper Leaders (overall) - All Ratings as of 27 February 2026 - Ratings for Total Return reflect funds' historical total return performance relative to peers. Lipper Ratings for Consistent Return reflect funds' historical risk-adjusted returns relative to peers. Lipper Ratings for Preservation are relative, rather than absolute. Lipper Leader ratings DO NOT take into account the effects of sales charges. Ratings are based on an equal-weighted average of percentile ranks for each measure over overall period.
