North Asian Equity Markets Rallied on Gains in Semiconductor Stocks

- **What happened:** In January 2026, the S&P 500 Index traded higher in U.S. Dollar (US\$) terms on signs of a stabilisation in the U.S. job market. However, the Ringgit-based returns of U.S. equities were impacted by the depreciation of the US\$ against the Ringgit during the month.
- Regional equity markets mostly rose in January 2026, with the South Korea and Taiwan markets recording new highs, led by gains in selected semiconductor stocks on the back of robust demand for advanced chips. The Chinese markets also rose for the month, driven by the launch of newer artificial intelligence (AI) applications and the Chinese government's economic stimulus measures.
- The ASEAN equity markets generally rose for a fourth consecutive month, led by gains in the Singapore, Malaysia and Thailand markets amid foreign fund inflows and the strengthening of most ASEAN currencies against the US\$. On the local front, the FBM KLCI rallied to its highest level since 2018 on gains in the financial and consumer sectors, which are beneficiaries of foreign fund inflows and a stronger Ringgit.
- **What's next:** The U.S. Federal Reserve's (Fed) monetary policy is expected to remain accommodative to support the U.S. job market. However, the pace and timing of further monetary easing will likely depend on the policies under Fed chair nominee Kevin Warsh, who will head the Fed by mid-May 2026 after confirmation by the Senate. Investors will also closely monitor the impact of U.S. trade tariffs, onshoring of investments, and the U.S. corporate earnings momentum amid a surge in AI spending.
- China's economic growth outlook is contingent on the effectiveness of government policies in bolstering domestic consumer demand and accelerating investments in innovative technologies to counter slower exports to the U.S.
- The ASEAN economic growth prospects generally remain positive, underpinned by resilient domestic demand, tourism activities and inflows of foreign direct investments. Selected ASEAN countries also have the capacity to introduce additional stimulus measures to counter any potential weakness in external demand.

- The Ringgit appreciated against the US\$ in January 2026 as the US\$ continued to ease against most currencies.
- The Ringgit also strengthened against most other currencies, with gains ranging between 0.5% and 2.4%.

Brent Crude Oil Price

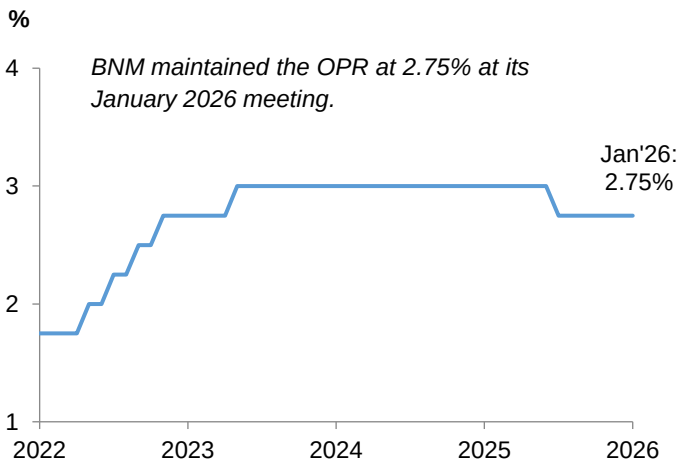

Source: Bloomberg

- The price of Brent crude oil surged by 16.2% to US\$70.7 per barrel in January 2026 amid geopolitical tensions in the Middle East and a colder-than-expected winter season.

Outlook

Malaysia

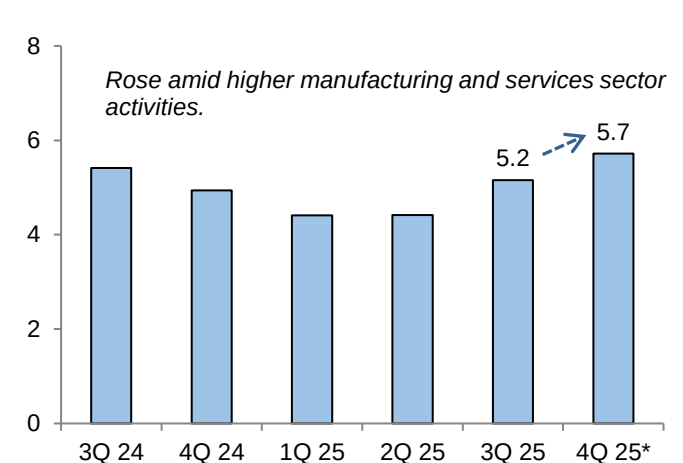

Malaysia's Overnight Policy Rate (OPR)

Source: BNM

- BNM maintained the OPR at 2.75% at its January 2026 meeting, following its pre-emptive 25-bp cut in July 2025.

Malaysia's Quarterly Real GDP Growth

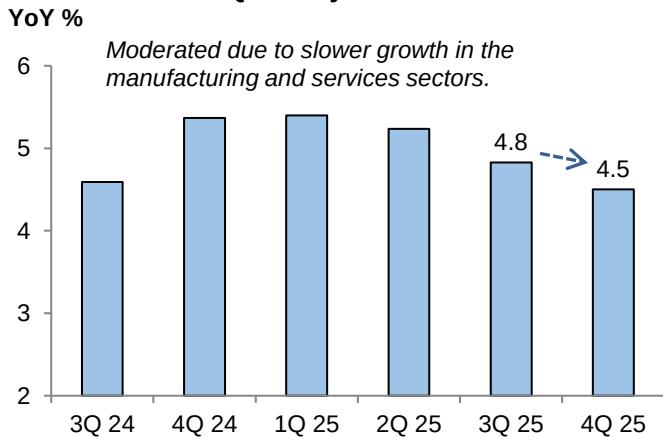

Source: Department of Statistics Malaysia (DOSM) * Advance estimates

- Malaysia's real gross domestic product (GDP) growth is estimated to have increased to 5.7% in 4Q 2025 from 5.2% in 3Q 2025, driven by higher manufacturing and services sector activities.
- For the full year of 2025, the Malaysian economic growth is estimated at 4.9% compared to 5.1% in 2024.

- The Ministry of Finance forecasts Malaysia's real GDP to expand by between 4.0% and 4.5% in 2026, driven by private consumption and investment spending.

Regional

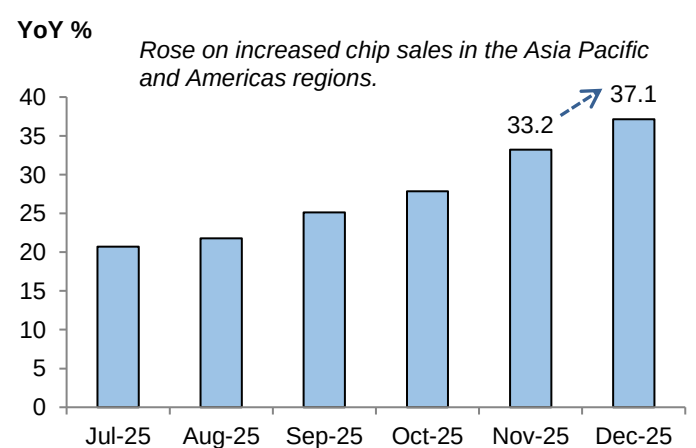

China's Quarterly Real GDP Growth

Source: Bloomberg

- China's real GDP growth moderated to 4.5% in 4Q 2025 from 4.8% in 3Q 2025, due to slower growth in the manufacturing and services sectors. For 2025, the Chinese economy expanded by 5.0% following a similar rate in 2024.
- The Chinese economy is envisaged to grow by 4.5% in 2026, based on market estimates.

Global Semiconductor Sales

Source: Bloomberg

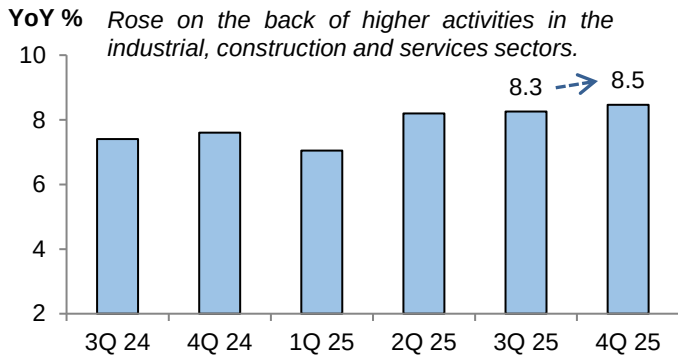

- Global semiconductor sales growth rose by 37.1% to US\$78.9 billion in December 2025, with increased chip sales in the Asia Pacific and Americas regions.
- On a yearly basis, global semiconductor sales grew by 25.6% to US\$791.7 billion in 2025 from US\$630.5 billion in 2024.

- China's economic growth outlook is contingent on the effectiveness of government policies in bolstering domestic consumer demand and accelerating investments in innovative technologies to counter slower exports to the U.S.
- South Korea and Taiwan remain key beneficiaries of the global AI boom. Their positions are sustained by the ongoing demand for advanced semiconductor chips required for AI and high-performance computing.

Outlook

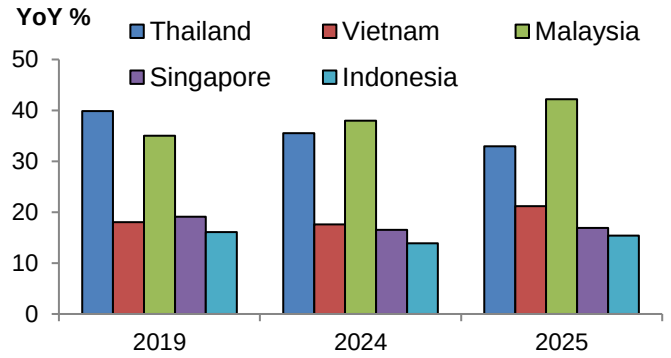

ASEAN

Vietnam's Quarterly Real GDP Growth

Source: Bloomberg

Selected ASEAN Tourist Arrivals

Source: Bloomberg

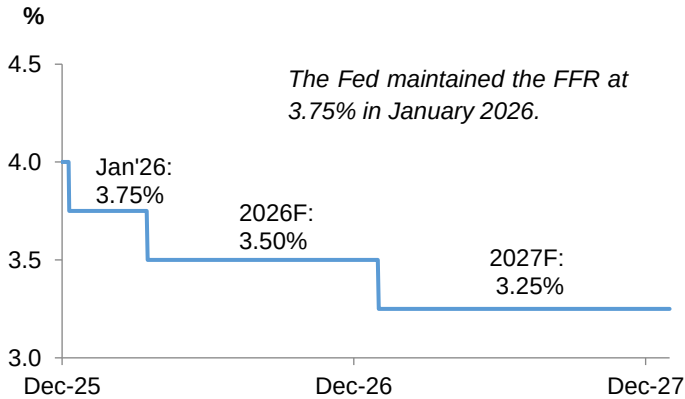

- Vietnam's real GDP growth rose to 8.5% in 4Q 2025 on the back of higher activities in the industrial, construction and services sectors. For 2025, Vietnam's economic growth improved further to 8.0% from 7.1% in the year prior.
- The Vietnam economy is projected to expand by 7.1% in 2026 and remains the fastest-growing ASEAN economy.

- In 2025, tourist arrivals in Vietnam and Malaysia surpassed their pre-pandemic levels by 18% and 20% respectively.

- The ASEAN economic growth prospects generally remain positive, underpinned by resilient domestic demand, tourism activities and inflows of foreign direct investments. Selected ASEAN countries also have the capacity to introduce additional stimulus measures to counter any potential weakness in external demand.

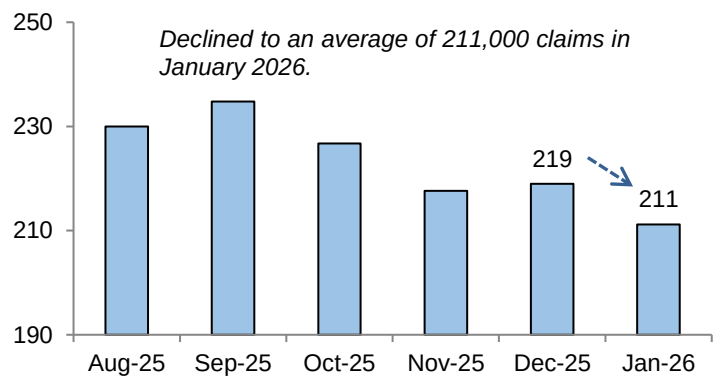

United States

Average of U.S. Weekly Jobless Claims

Source: Bloomberg

- The U.S. Fed maintained the FFR at the target range of 3.50%-3.75% at the Federal Open Market Committee meeting in January 2026. The policy statement noted that U.S. economic conditions have improved while inflation levels remain somewhat elevated.

- The U.S.' weekly jobless claims declined to an average of 211,000 claims in January 2026.

- The Fed's monetary policy is expected to remain accommodative to support the U.S. job market. However, the pace and timing of further monetary easing will likely depend on the policies under Fed chair nominee Kevin Warsh, who will head the Fed by mid-May 2026 after confirmation by the Senate.
- Investors will also closely monitor the impact of U.S. trade tariffs, onshoring of investments, and the U.S. corporate earnings momentum amid a surge in AI spending.

Lipper Leaders:

Total Return

Lipper Ratings for Total Return reflect funds' historical total return performance relative to peers.

Consistent Return

Lipper Ratings for Consistent Return reflect funds' historical returns, adjusted for volatility, relative to peers.

Preservation

Lipper Ratings for Preservation reflect funds' historical loss avoidance relative to other funds within the same asset class. Scores for Preservation are computed from three broad asset classes — equity funds, mixed-equity funds, and fixed-income (bond) funds.

The Lipper Ratings are subject to change every month and are based on an equal-weighted average of percentile ranks for the Total Return, Consistent Return and Preservation metrics over three-, five-, and ten-year periods (if applicable). The highest 20% of funds in each peer group are named Lipper Leaders or a score of 5, the next 20% receive a score of 4, the middle 20% are scored 3, the next 20% are scored 2, and the lowest 20% are scored 1.

Lipper Leaders (overall) - All Ratings as of 30 January 2026 - Ratings for Total Return reflect funds' historical total return performance relative to peers. Lipper Ratings for Consistent Return reflect funds' historical risk-adjusted returns relative to peers. Lipper Ratings for Preservation are relative, rather than absolute. Lipper Leader ratings DO NOT take into account the effects of sales charges. Ratings are based on an equal-weighted average of percentile ranks for each measure over overall period.

Lipper Fund Volatility

The Volatility Factor (VF) means there is a possibility for the fund in generating an upside return or downside return around this VF. The Volatility Class (VC) is assigned by Lipper based on quintile ranks of the VF for qualified funds. The VF is subject to monthly revisions and the VC is revised every six months or other intervals as advised by FIMM. The volatility banding for the "Very Low", "Low", "Moderate", "High" and "Very High" VCs as at 31 December 2025 are $0.000 \leq VF \leq 4.215$, $4.215 < VF \leq 7.785$, $7.785 < VF \leq 10.325$, $10.325 < VF \leq 13.660$ and VF more than 13.660 respectively. For this period to 30 June 2026, the VCs for the funds are based on the VFs of the respective funds as at 31 December 2025. The fund's portfolio may have changed since this date and there is no guarantee that the fund will continue to have the same VF or VC in the future. Presently, only funds launched in the market for at least 36 months will display the VF and its VC.

- Notes :**
- The total return is the overall return of the fund over the period.
 - The annualised return is the compounded annual rate of return of the fund over the specified period. The annualised returns for the Year-to-Date (YTD) period as well as for funds which have commencement dates of less than 1 year ago are not computed as they are deemed not meaningful.
 - There are fees and charges involved that may affect the returns over time.
 - The performances of funds are calculated net of all fees on an NAV-to-NAV basis and are sourced from Lipper.
 - Fund performance should be evaluated against the benchmark index which is reflective of the fund's asset allocation and investments over the medium to long term.
 - Commencement date is the last day of the initial offer period.
 - The distribution yields of funds are computed by dividing gross distribution for the financial year/period over the Ex-NAV per unit and it is not directly comparable with fixed deposit rate.
 - The asset allocation presented have been verified by the Trustees.
 - The stocks invested by the fund are classified according to various criteria which include the country classification assigned by international index providers and the company's main business interests in terms of geographical segmentation.
