

Equity Markets Traded Mixed amid the Middle East Conflict

- **What happened:** The U.S. equity markets eased in 1Q 2026 amid near-term tariff uncertainties following the U.S. Supreme Court's ruling against the imposition of tariffs under the International Emergency Economic Powers Act, while global crude oil prices increased significantly in March 2026 following the recent Iran conflict.
- Regional equity markets traded mixed in 1Q 2026, with the South Korea and Taiwan markets rising on gains in selected semiconductor stocks amid robust demand for advanced artificial intelligence (AI)-related semiconductor chips, while the Chinese markets fell after China set a lower economic growth target for 2026.
- The ASEAN equity markets, as proxied by the FTSE/ASEAN 40 Index, traded higher in 1Q 2026, led by gains in the Thailand and Singapore markets, which offset declines in the Indonesia and Vietnam markets. On the local front, the FBM KLCI rose slightly in 1Q 2026 amid a firmer Ringgit and inflows of foreign funds in the first 2 months of the year.
- **What's next:** Global growth in 2026 is poised to be supported by steady consumption and increasing investments in AI and digital infrastructure. However, a protracted Middle East conflict and disruptions in the Strait of Hormuz could pose economic headwinds.
- Policymakers remain vigilant against cost-push inflation and are prepared to deploy targeted fiscal subsidies and increase liquidity to support domestic economies should energy prices remain elevated. Investors will continue to monitor the impact of geopolitical developments, U.S. trade policies, as well as the resulting effects of energy costs on global inflation and interest rates.
- Equity investors are advised to adopt a long-term investment horizon and practise Ringgit-unit cost averaging. This strategy helps to navigate near-term market volatility and positions portfolios to potentially benefit from a market rebound once regional tensions subside.

Comparison of Stock Markets' Performances

Update on Equity Markets

Malaysia

FBM KLCI

Source: Bloomberg

- The FBM KLCI registered a slight gain in 1Q 2026 amid a firmer Ringgit and inflows of foreign funds in the first 2 months of the year on the back of a firm Ringgit.

Top sector movers in Malaysia (1Q 2026)

Source: Bloomberg

- The plantation, industrial (petrochemicals and aluminium) and energy sectors benefitted from the rise in global crude oil prices in March 2026.
- However, the gains were partially offset by selected profit-taking activities in the construction and technology sectors.

Regional

S&P Pan Asia Ex-JP, AU, NZ, IN Index*

* S&P Pan Asia Ex-Japan, Australia, New Zealand and India
Source: S&P Dow Jones Indices, LLC

- The S&P Pan Asia Index traded higher in 1Q 2026, led by gains in the South Korea and Taiwan equity markets, which offset declines in the Chinese equity markets.

Korea Composite Stock Price Index (KOSPI)

Source: Bloomberg

- South Korea's KOSPI rallied in 1Q 2026, driven by gains in semiconductor stocks amid robust demand for advanced memory chips.

Update on Equity Markets

ASEAN

FTSE/ASEAN 40 Index

Source: Bloomberg

- The ASEAN equity markets, as proxied by the FTSE/ASEAN 40 Index, rose in 1Q 2026, led by gains in the Thailand and Singapore markets, which offset declines in the Indonesia and Vietnam markets.

Stock Exchange of Thailand Index (SET)

Source: Bloomberg

- Thailand's stock market was the best-performing ASEAN equity market in 1Q 2026, benefitting from the appointment of a new Prime Minister and the Thai central bank's interest rate cut.

United States (U.S.)

Standard & Poor's (S&P) 500 Index

Source: Bloomberg

- The S&P 500 Index declined in 1Q 2026 amid near-term tariff uncertainties following the U.S. Supreme Court's ruling against the imposition of tariffs under the International Emergency Economic Powers Act, while global crude oil prices rose significantly in March 2026 following the recent Iran conflict.

Top sector movers in the U.S. (1Q 2026)

Source: Bloomberg

- The performance of the S&P 500 Index in 1Q 2026 was weighed by declines in the communications, information technology and consumer discretionary sectors.
- Nonetheless, the energy and material (petrochemical) sectors posted gains amid higher crude oil prices.

Update on Bond & Currency Markets

Bonds

Quarterly Bond Yield Movement

Tenor	4Q 2025 (%)	1Q 2026 (%)	Change* (bps)
3-Year Bonds			
U.S. Treasury Bond	3.54	3.82	+28
MGS	3.00	3.26	+26
10-Year Bonds			
U.S. Treasury Bond	4.17	4.32	+15
MGS	3.49	3.63	+14

Note: As at 31 March 2026 * In basis points (bps)
Source: Bloomberg, Bank Negara Malaysia (BNM)

- In 1Q 2026, the yields of the 3-year and 10-year U.S. Treasury (UST) rose by 28 and 15 bps respectively, on inflation risks stemming from higher crude oil prices following the recent Iran conflict.

10-Year Malaysian Government Securities (MGS) Yield

Source: BNM

- The yield of 10-year MGS ended 14 bps higher in 1Q 2026, driven by increased local corporate bond supply and the rise in UST yields.

Currencies

Quarterly MYR Movement vs Selected Currencies

	4Q 2025 % change [#]	1Q 2026 % change [#]	MYR per currency*
Euro	+3.7	+2.7	4.64
100 Japanese Yen	+9.7	+2.2	2.54
Pound Sterling	+3.6	+2.1	5.35
Singapore Dollar	+3.4	+0.6	3.14
U.S. Dollar	+3.6	+0.2	4.05
Chinese Yuan	+1.7	-0.9	0.59
Australian Dollar	+2.5	-2.3	2.77

Note: * Data as at 31 March 2026
[#] Change indicates the Ringgit's movement vs foreign currencies
Source: Bloomberg

- The Ringgit appreciated slightly by 0.2% against the U.S. Dollar (US\$) in 1Q 2026.
- The Ringgit also strengthened against most other currencies, with gains ranging between 0.6% and 2.7%.

Brent Crude Oil Price

Source: Bloomberg

- The price of Brent crude oil surged by 94% to US\$118 per barrel in 1Q 2026 as the Middle-East conflict disrupted around one-fifth of the global energy supply through the Strait of Hormuz.

Outlook

Malaysia

Malaysia's Real GDP Growth

Source: Department of Statistics Malaysia, * BNM

- In its latest annual report, BNM projects Malaysia's real gross domestic product (GDP) growth for 2026 to range between 4.0% and 5.0% (2025: 5.2%), underpinned by domestic consumption and investment activities.
- Meanwhile, the central bank expects Malaysia's inflation rate to range between 1.5% and 2.5% in 2026.

Malaysia's Fiscal Oil Revenue*

*Includes petroleum income tax, royalties and PETRONAS dividends
Source: BNM

- In 2025, Malaysia's oil-related revenue amounted to RM55.5 billion, accounting for 16.5% of total government revenue, with crude oil prices averaging US\$68 per barrel for the year.
- The potential increase in oil-related revenue from higher crude oil prices could cushion the rise in the fuel subsidy bill. The Malaysian government stands to gain an average of RM300 million in revenue for every US\$1 increase in oil price.

- Malaysia's targeted fuel subsidies and cash handouts could partly help mitigate the pass-through of higher global crude oil prices to domestic inflation and cost of living.

Regional

China's Real GDP Growth

Source: Bloomberg * NPC Forecast

- During the National People's Congress (NPC) meeting in March 2026, the Chinese government set a real GDP growth target of 4.5% to 5.0% for 2026 (2025: 5.0%).
- To support strategic growth, China plans CNY1.3 trillion in special bonds, CNY4.4 trillion for local projects, and CNY100 billion for consumption, while its research & development spending will increase by 7% year-on-year in 2026.

Global Semiconductor Sales

Source: Bloomberg

- Global semiconductor sales rose by 61.8% to US\$88.8 billion in February 2026, with increased chip sales in the Asia Pacific and Americas regions.

- Looking ahead, China's economic momentum will depend on the effectiveness of policy measures aimed at stimulating domestic consumer demand and accelerating investments in emerging technologies.
- South Korea and Taiwan are beneficiaries of the global surge in demand for advanced semiconductor chips that are essential to high-performance computing and AI-related infrastructure.

Outlook

ASEAN

Selected ASEAN Countries' Real GDP Growth Forecast

Source: Bloomberg

Selected ASEAN Countries' Fiscal Budget/GDP

Source: Bloomberg

- Based on market estimates, selected ASEAN economies are forecast to expand by between 1.8% and 7.2% in 2026 after growing within a range of between 2.4% and 8.0% in 2025.

- Most ASEAN countries have moderate fiscal deficits as a percentage of their GDP, with Singapore recording a budget surplus in 2025.

- Selected ASEAN nations have some policy space to implement targeted stimulus measures to counter the impact of potentially softer economic growth amid higher crude oil prices.

U.S.

Federal Funds Rate (FFR) (Upper Bound)

Source: Fed projections at the March 2026 meeting

2026 U.S. Economic Projections

	Median	
	Dec 2025	Mar 2026
Real GDP (%YoY)	2.3	2.4
Unemployment Rate (%)	4.4	4.4
PCE inflation (%YoY)	2.4	2.7
Core PCE inflation (%YoY)	2.5	2.7
Federal Funds Rate (%)	3.4	3.4

Source: Fed projections at the March 2026 meeting

- The U.S. Federal Reserve (Fed) kept the FFR at a target range of 3.50%-3.75% at the Federal Open Market Committee (FOMC) meeting in March 2026 and maintained its projection of one 25-basis point rate cut in 2026.
- The Fed will monitor the risks to its dual mandate of maximum employment and price stability amid developments in the Middle East.

- At the March 2026 FOMC meeting, the Fed raised its forecast for the U.S.' 2026 real GDP growth from 2.3% to 2.4% as consumer spending remains resilient and business fixed investment continues to expand.
- However, the Fed projected a higher inflation rate of 2.7% compared to its previous estimate of 2.4% amid tariffs uncertainties and rising oil prices.

- Investors will continue to assess the impact of higher crude oil prices, trade policies, supply-chain shifts and AI-related spending on the U.S.' corporate earnings momentum.

Investors are advised to read and understand the contents of the Master Prospectus 1 of PB Series of Funds dated 28 August 2023, 1st Supplemental Prospectus of Master Prospectus 1 of PB Series of Funds dated 3 December 2025 and Prospectus of PB Sustainable Growth Fund dated 5 September 2023 and the relevant fund's Product Highlights Sheet (PHS) before investing.

Investors should understand the risks of the funds, as well as compare and consider the fees, charges and costs involved in investing in the funds.

A copy of the Prospectus, Supplemental Prospectus and PHS of PB Series of Funds can be viewed at our website www.publicmutual.com.my under FUNDS > Select Your Fund.

Investors should make their own assessment of the merits and risks of the investment. If in doubt, investors should seek for professional advice.

Past performance of the funds is not a reliable indicator of future performance.

A sales charge (if any) will be imposed on purchases of units of the funds and deducted upfront from the investment amount.

Please refer to www.publicmutual.com.my for our investment disclaimer.

Where a free copy of the Prospectus and Product Highlights Sheet can be obtained: Corporate representatives stationed at all branches of Public Bank or contact Public Mutual's Hotline: 03-2022 5000 for assistance.

Lipper Leaders:

Total Return

Lipper Ratings for Total Return reflect funds' historical total return performance relative to peers.

Consistent Return

Lipper Ratings for Consistent Return reflect funds' historical returns, adjusted for volatility, relative to peers.

Preservation

Lipper Ratings for Preservation reflect funds' historical loss avoidance relative to other funds within the same asset class. Scores for Preservation are computed from three broad asset classes — equity funds, mixed-equity funds, and fixed-income (bond) funds.

The Lipper Ratings are subject to change every month and are based on an equal-weighted average of percentile ranks for the Total Return, Consistent Return and Preservation metrics over three-, five-, and ten-year periods (if applicable). The highest 20% of funds in each peer group are named Lipper Leaders or a score of 5, the next 20% receive a score of 4, the middle 20% are scored 3, the next 20% are scored 2, and the lowest 20% are scored 1.

Lipper Leaders (Overall) - All Ratings as of 31 March 2026 - Ratings for Total Return reflect funds' historical total return performance relative to peers. Lipper Ratings for Consistent Return reflect funds' historical risk-adjusted returns relative to peers. Lipper Ratings for Preservation are relative, rather than absolute. Lipper Leader ratings DO NOT take into account the effects of sales charges. Ratings are based on an equal-weighted average of percentile ranks for each measure over overall period.

Lipper Ratings and Lipper Classifications do not constitute and are not intended to constitute investment advice or an offer to sell or the solicitation of an offer to buy any security of any entity in any jurisdiction. As a result, you should not make an investment decision on the basis of this information. Rather, you should use Lipper Ratings and Lipper Classifications for informational purposes only.

LIPPER  LIPPER LEADERS KEY HIGHEST      LOWEST

Lipper Fund Volatility

The Volatility Factor (VF) means there is a possibility for the fund in generating an upside return or downside return around this VF. The Volatility Class (VC) is assigned by Lipper based on quintile ranks of the VF for qualified funds. The VF is subject to monthly revisions and the VC is revised every six months or other intervals as advised by FIMM. The volatility banding for the "Very Low", "Low", "Moderate", "High" and "Very High" VCs as at 28 February 2026 are $0.000 \leq VF \leq 4.245$, $4.245 < VF \leq 7.705$, $7.705 < VF \leq 10.245$, $10.245 < VF \leq 13.525$ and VF more than 13.525 respectively. For this period to 30 June 2026, the VCs for the funds are based on the VFs of the respective funds as at 28 February 2026. The fund's portfolio may have changed since this date and there is no guarantee that the fund will continue to have the same VF or VC in the future. Presently, only funds launched in the market for at least 36 months will display the VF and its VC.

- Notes:**
- The total return is the overall return of the fund over the period.
 - The annualised return is the compounded annual rate of return of the fund over the specified period. The annualised returns for the Year-to-Date (YTD) period are not computed as they are deemed not meaningful.
 - There are fees and charges involved that may affect the returns over time.
 - The performances of funds are calculated net of all fees on an NAV-to-NAV basis and are sourced from Lipper.
 - Fund performance should be evaluated against the benchmark index which is reflective of the fund's asset allocation and investments over the medium to long term.
 - Commencement date is the last day of the initial offer period.
 - The distribution yields of funds are computed by dividing gross distribution for the financial year/period over the Ex-NAV per unit and it is not directly comparable with fixed deposit rate.
 - The asset allocation presented have been verified by the Trustees.
 - The stocks invested by the fund are classified according to various criteria which include the country classification assigned by international index providers and the company's main business interests in terms of geographical segmentation.
