Most Equity Markets Rebounded amid Resilient Corporate Earnings for 1Q 2026

- **What happened:** The S&P 500 Index rose to reach a new all-time high in April 2026 on the back of resilient 1Q 2026 corporate earnings results from selected technology companies.
- Most regional equity markets rose in April 2026, led by a rally in the South Korea and Taiwan markets amid strong 1Q 2026 corporate earnings results from semiconductor companies, driven by robust global demand for artificial intelligence (AI)-related chips. Meanwhile, China's equity markets partially recovered during the month on the back of a firmer domestic economic growth for 1Q 2026 compared to 4Q 2025.
- The ASEAN equity markets, as proxied by the FTSE/ASEAN 40 Index, rose slightly in April 2026, supported by gains in the Vietnam, Thailand and Malaysia markets. The FBM Hijrah Shariah Index traded higher in April 2026 amid foreign fund inflows in tandem with a firm Ringgit and a resilient domestic economic growth for 1Q 2026.
- **What's next:** Looking ahead, investors will continue to monitor the impact of elevated energy prices, trade policies, supply-chain shifts and AI-related investments on corporate earnings.
- Additional fiscal and/or monetary policy tools could potentially be introduced by various countries to support their domestic economies or to contain the impact of higher fuel costs should energy prices remain elevated. These measures could be in the form of additional fiscal spending (e.g. targeted subsidies) and supportive interest rate policies.
- Equity markets may experience volatility in the near term amid elevated crude oil prices due to supply disruptions. As such, equity investors should adopt a long-term perspective and practise Ringgit-unit cost averaging to potentially benefit from the market's volatility amid geopolitical developments in the Middle East.

- The price of Brent crude oil eased slightly by 3.7% to US\$114 per barrel in April 2026 amid a temporary ceasefire between the U.S. and Iran.

Outlook

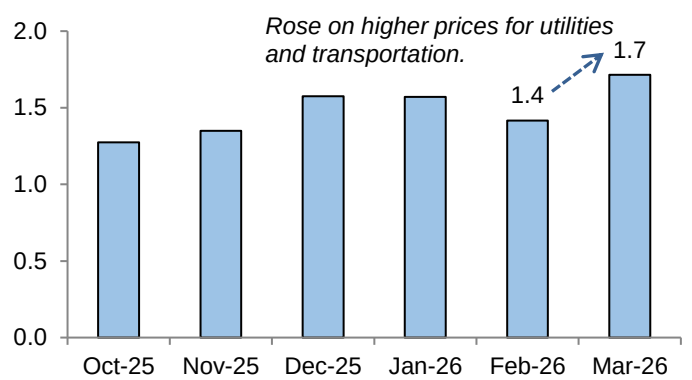

Malaysia

YoY % Malaysia's Quarterly Real GDP Growth

Source: DOSM * Advance estimates

YoY % Malaysia's Consumer Price Index (CPI) Inflation Rate

Source: DOSM

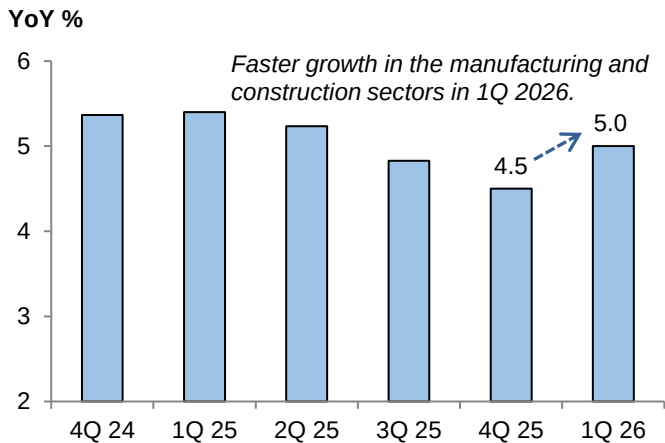

- Malaysia's real gross domestic product (GDP) expanded by 5.3% year-on-year (YoY) in 1Q 2026, based on preliminary estimates by the Department of Statistics Malaysia (DOSM).
- The slower real GDP growth for 1Q 2026 (compared to the 6.3% YoY growth in 4Q 2025) was mainly attributed to a moderation in growth in the services sector.

- Malaysia's CPI inflation rate increased by 1.7% YoY in March 2026 amid higher prices for utilities and transportation.

- Bank Negara Malaysia (BNM) projects Malaysia's real GDP growth to range from 4.0% to 5.0% YoY in 2026 (2025: 5.2% YoY), underpinned by domestic consumption and investment activities. The government's petrol subsidies and social assistance have helped to partially alleviate the direct impact of the rise in global crude oil prices on the cost of living.

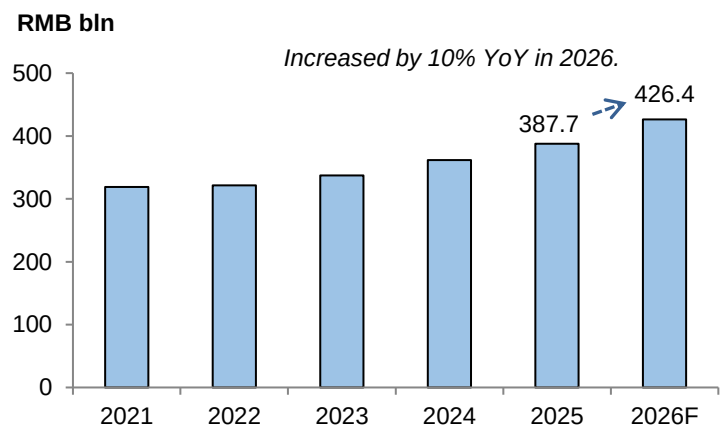

Regional

YoY % China's Quarterly Real GDP Growth

RMB bln China's Central Government Expenditure on Science & Technology

Source: Bloomberg

- China's real GDP growth improved to 5.0% YoY in 1Q 2026 compared to 4.5% YoY in 4Q 2025, driven by growth in the manufacturing and construction sectors.
- For 2026, the Chinese government is targeting a real GDP growth of 4.5% - 5.0% YoY, compared to 5.0% YoY in 2025.

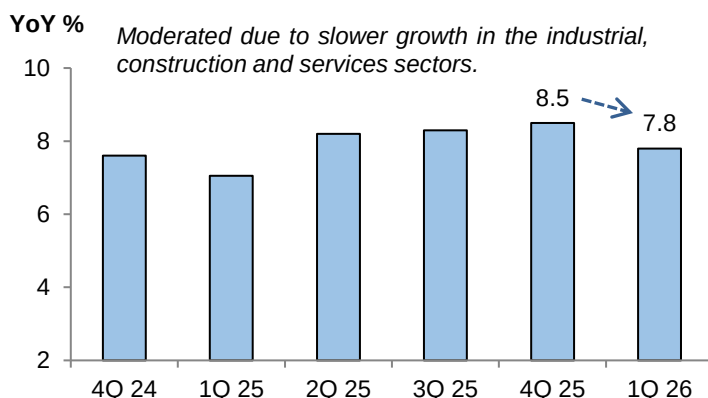

- China's central government allocation for expenditure in science and technology increased by 10% YoY to RMB426.4 billion in 2026.
- China aims to increase technological self-reliance by enhancing innovation and tackling core technologies such as integrated circuits.

- China's economic momentum will depend on the effectiveness of the government's policy measures to stimulate domestic consumer demand and accelerate investments in emerging technologies.
- South Korea and Taiwan are beneficiaries of the global surge in demand for advanced semiconductor chips that are essential to high-performance computing and AI infrastructure.

Outlook

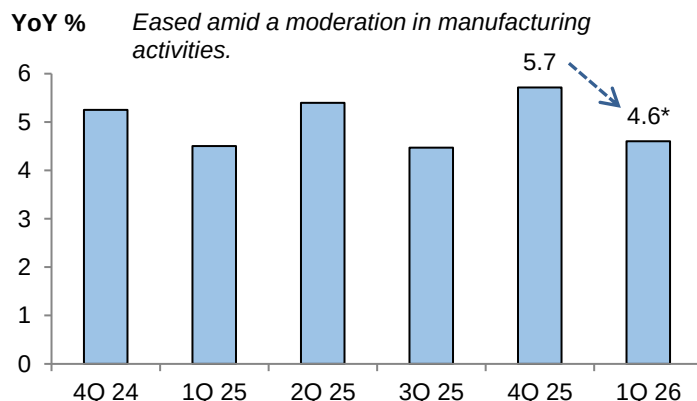

ASEAN

Vietnam's Quarterly Real GDP Growth

Source: Bloomberg

Singapore's Quarterly Real GDP Growth

Source: Department of Statistics Singapore * Advance estimates

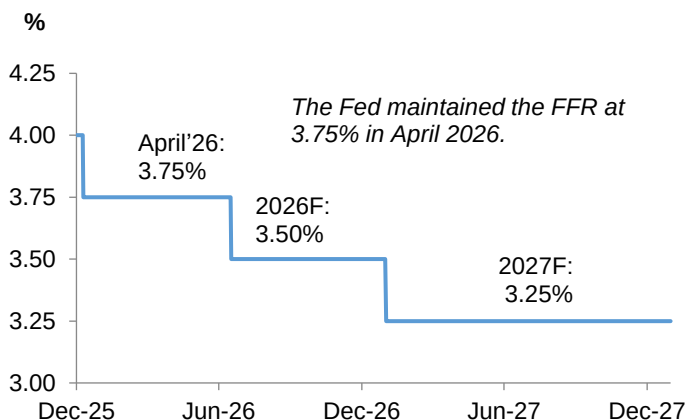

- Vietnam's real GDP growth moderated to 7.8% YoY in 1Q 2026 due to slower growth in the industrial, construction and services sectors.
- Vietnam's economy is projected to expand by 7.0% YoY in 2026, based on market estimates.

- Singapore's real GDP growth eased to 4.6% YoY in 1Q 2026 amid a moderation in manufacturing activities, according to advance estimates by the Department of Statistics Singapore.
- Singapore's Ministry of Trade and Industry projects Singapore's real GDP to grow within a range between 2.0% and 4.0% YoY in 2026.

- Several ASEAN countries including Thailand, Vietnam and Indonesia have implemented policies such as cash handouts, as well as cuts to fuel and airfare taxes to ease inflationary pressures amid higher energy prices.
- Looking ahead, selected ASEAN nations have the flexibility in terms of policies to implement targeted stimulus measures to counter the impact of potentially softening economic growth and elevated crude oil prices.

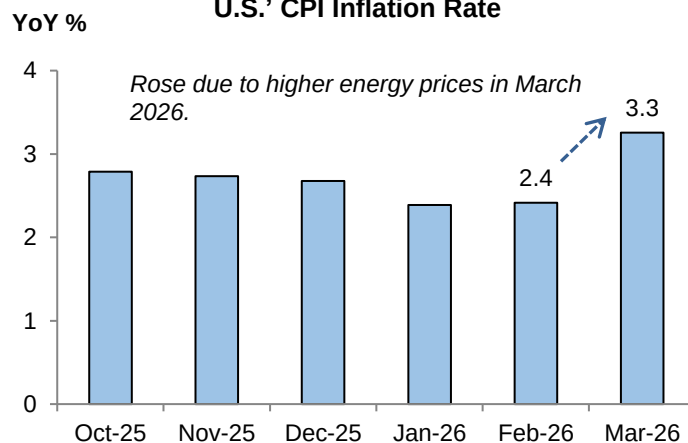

United States

Federal Funds Rate (FFR) (Upper Bound)

Source: Fed projections at the March 2026 meeting

U.S.' CPI Inflation Rate

Source: Bloomberg

- The Federal Reserve (Fed) kept the FFR at the target range of 3.50%-3.75% at its policy meeting in April 2026. The recent conflict in the Middle East has increased inflation risks, which may delay the timing of potential policy rate cuts.

- The U.S.' CPI inflation rate rose to 3.3% YoY in March 2026 due to higher energy prices amid the ongoing Middle East conflict.
- The core inflation rate rose slightly to 2.6% YoY in March 2026 from 2.5% YoY in February 2026.

- Investors will continue to monitor the impact of rising oil prices, trade policies, supply-chain shifts and AI-related investments on corporate earnings and the overall U.S. economy.

Lipper Leaders:

Total Return

Lipper Ratings for Total Return reflect funds' historical total return performance relative to peers.

Consistent Return

Lipper Ratings for Consistent Return reflect funds' historical returns, adjusted for volatility, relative to peers.

Preservation

Lipper Ratings for Preservation reflect funds' historical loss avoidance relative to other funds within the same asset class. Scores for Preservation are computed from three broad asset classes — equity funds, mixed-equity funds, and fixed-income (bond) funds.

The Lipper Ratings are subject to change every month and are based on an equal-weighted average of percentile ranks for the Total Return, Consistent Return and Preservation metrics over three-, five-, and ten-year periods (if applicable). The highest 20% of funds in each peer group are named Lipper Leaders or a score of 5, the next 20% receive a score of 4, the middle 20% are scored 3, the next 20% are scored 2, and the lowest 20% are scored 1.

Lipper Leaders (overall) - All Ratings as of 30 April 2026 - Ratings for Total Return reflect funds' historical total return performance relative to peers. Lipper Ratings for Consistent Return reflect funds' historical risk-adjusted returns relative to peers. Lipper Ratings for Preservation are relative, rather than absolute. Lipper Leader ratings DO NOT take into account the effects of sales charges. Ratings are based on an equal-weighted average of percentile ranks for each measure over overall period.

Lipper Fund Volatility

The Volatility Factor (VF) means there is a possibility for the fund in generating an upside return or downside return around this VF. The Volatility Class (VC) is assigned by Lipper based on quintile ranks of the VF for qualified funds. The VF is subject to monthly revisions and the VC is revised every six months or other intervals as advised by FIMM. The volatility banding for the "Very Low", "Low", "Moderate", "High" and "Very High" VCs as at 31 March 2026 are $0.000 \leq VF \leq 4.370$, $4.370 < VF \leq 8.135$, $8.135 < VF \leq 10.965$, $10.965 < VF \leq 14.295$ and VF more than 14.295 respectively. For this period to 30 June 2026, the VCs for the funds are based on the VFs of the respective funds as at 31 March 2026. The fund's portfolio may have changed since this date and there is no guarantee that the fund will continue to have the same VF or VC in the future. Presently, only funds launched in the market for at least 36 months will display the VF and its VC.

- Notes:**
- The total return is the overall return of the fund over the period.
 - The annualised return is the compounded annual rate of return of the fund over the specified period. The annualised returns for the Year-to-Date (YTD) period are not computed as they are deemed not meaningful.
 - There are fees and charges involved that may affect the returns over time.
 - The performances of funds are calculated net of all fees on an NAV-to-NAV basis and are sourced from Lipper.
 - Fund performance should be evaluated against the benchmark index which is reflective of the fund's asset allocation and investments over the medium to long term.
 - Commencement date is the last day of the initial offer period.
 - The distribution yields of funds are computed by dividing gross distribution for the financial year/period over the Ex-NAV per unit and it is not directly comparable with fixed deposit rate.
 - The asset allocation presented have been verified by the Trustees.
 - The stocks invested by the fund are classified according to various criteria which include the country classification assigned by international index providers and the company's main business interests in terms of geographical segmentation.
